

Zoom is optimized for speech, so singing and instrumentals are poorly reproduced without a change to some of the settings.

Firstly, Run a meeting.

Windows:

In Zoom, once in the meeting, click the caret ^ to the right of the mute microphone icon, opening a window into **audio settings**.

Click on “audio settings” at the bottom of this opened window.

Under the Microphone settings, turn off the “automatic adjust volume” setting

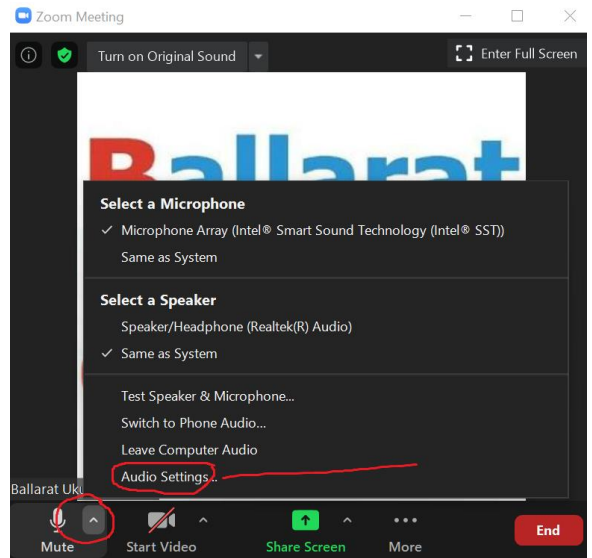

An “**advanced settings**” button should appear in the lower right corner. Click on that

Click the Show in-meeting option to “Enable Original Sound” from microphone

Under Audio Processing adjust the settings about background noise and Echo this way (see image below):

Close this window

Back on the main page where your video appears, make sure the upper left corner reads: “turn off original sound”. That lets you know that original sound is now actually turned on.

< Back

Show in-meeting option to "Enable Original Sound" from microphone

Audio Processing

[Restore Defaults](#)

Suppress Persistent Background Noise ?	Disable
Suppress Intermittent Background Noise ?	Disable
Echo cancellation	Auto

Ipads:

Look for the daisy wheel, or gear symbol on the left of the screen.

Meeting Settings - **uncheck** "Use Original Sound"
